16. Elkészült a raktárkezelő szoftver legfrissebb verziója. Írjon e-mailt, amiben leírja az ügyfélnek, hogy honnan tudja letölteni az új szoftvert, mi a teendője a telepítés során, és mi változott a programban!
    – Mondja el, mire van szükség az új szoftver letöltéséhez! Pl.: URL, felhasználói név, jelszó.
    – Részletezze a telepítés lépéseit! Pl.: szerver oldali teendők, kliens oldali feladatok.
    – Mondjon néhány raktári programra jellemző funkciót! pl.: a raktári kivételezés folyamata most már vonalkód olvasóval is működik, a leltári ív nyomtatásánál lehetőség van a darabszámok megjelenítésére

Dear Sirs,

I am writing to inform you that our company has developed the new version of the ABC inventory management software which provides you with new features and useful functions making your work simpler and easier.

We highly recommend to upgrade to the latest software version in order to stay on top and keep everything running smoothly and to improve your performance. The new version is available on the following link which you need to copy to your internet browser. Since your company has already registered to our system, you do not need to create a new account to upgrade your software. Enter your account number and password and you will be able to start downloading and implement installation. Furthermore, you do not have to pay for this upgrade, it is completely free, we do not charge you anything for it.

Before installing the upgrade you need to download the latest version of Java programme, which is available on the following link: https://java.com/en/download/
Another useful thing we advise you is to allow your google chrome browser to run Flash, otherwise, there might be some pages which won't be displayed. After you have installed the programme by following the steps of setup wizard, please restart your computer.

The new version of our software contains a lot of new components. One of these features is barcode scanning which can help with stocktaking, stock organizing, and knowing when to order. With this function you can find your inventory data quickly and efficiently, which automatically eliminates costly mistakes. In addition, inventory sheets can be printed out more easily, indicating as much information as you may need, for example the quantity of different items. For detailed information of new features and improvements and all later versions, see *What's new?* section on our website. The new inventory management software also includes training manuals and other information available to use.

If you have further questions concerning the new version of our product please do not hesitate to contact us.

Best Regards

XY
